EXPERIENCE

Software Engineer - Full Stack

July 2025 - Present

NJ Group

- Worked on Spring & Spring Boot applications, Oracle and MySQL Databases, API Development.
- Built a Bulk Payment Processing module in a financial accounting system, reducing manual payment execution time by ~**90%** and improving operational efficiency.
- Achieved **2-4×** API performance improvement by optimizing database queries, indexing strategies, and efficient resource utilization.
- Integrated CRM data pipelines into the Partner Desk 2.0 platform, enabling seamless partner onboarding and centralized data access.
- Collaborated with cross-functional teams (product, QA, frontend) to deliver scalable and production-ready features.

Software Engineer Intern

January 2025 - June 2025

NJ Group

- Developed the frontend of **AMFITRAX**, a partner exam platform, from scratch, currently used by NJ Group's partners for registration in the mutual fund distribution examination.
- Optimized database queries, reducing overall query execution time by **up to 70%**, improving system performance and responsiveness.
- Designed and built a **task management system** during the internship, including user authentication, Excel-based data validation, and import/export functionality for task reports.

MY PROJECTS

Skill Foundry | *Live* | Online Technical Courses Platform

Summer 2025

- Built **Skill Foundry**, a full-stack online technical learning platform, **single-handedly from scratch**, focused on coding and programming guides.
- Optimized landing page performance, achieving ~**80% load-time improvement**, implemented **SEO best practices**, and ranked **Top-2 on SERP** for targeted keywords
- Integrated **Razorpay payment gateway** with **multi-currency support** and **automatic currency detection** based on user geolocation.
- Implemented **end-to-end purchase flow**, including automated post-purchase emails using **Razorpay Webhooks**, **lifetime course access** via authentication-based login, and secure digital content delivery.
- Enabled **sales automation**, achieving **1,000+ successful sales**, with improved customer experience and automated email workflows.
- Developed a **sales and invoice management dashboard** with **monthly invoice generation** for domestic and international transactions, ensuring **GST compliance**.

Ecommerce Project

Summer 2023

- Full-stack e-commerce application using the MERN stack, including an admin dashboard for product creation, update, and deletion.
- Implemented product variants (color and size), advanced storefront filtering, add-to-cart functionality, and an order summary workflow.

SKILLS & CERTIFICATIONS

- **Languages:** JAVA, SQL, JavaScript
- **Tools and Technologies:** Git, SonarQube, Redis, Kubernetes
- **Databases:** MySQL, Oracle, MongoDB

EDUCATION

Sarvajanik University Gujarat, India	
Master of Computer Applications CGPA: 8.9	May 2025
Veer Narmad South Gujarat University Gujarat, India	
Bachelor of Computer Applications CGPA: 7.4	May 2023
